

FAST FACTS

Revalor®-XS (trenbolone acetate and estradiol)

Revalor-XS is the industry's first and only staged-release combination implant.

- ▶ In a single dose, Revalor-XS provides the same proven dosage of trenbolone acetate and estradiol found in two-dose combinations.
- ▶ For short- or long-fed cattle, Revalor-XS is your implant solution for assurance that your bottom line is protected without additional stress on you and your cattle.
- ▶ Revalor-XS provides a positive return on investment for cattle fed 132 days or more.

All the power with just one trip through the chute.

- ▶ Less stress on cattle leads to more feed intake.
- ▶ Save labor costs for more urgent tasks.
- ▶ Minimizes inefficiencies caused by weather, outbreaks, market conditions and other unforeseen circumstances.

You can't count on the cattle market or Mother Nature, but you can always count on Revalor-XS.
